

SMALL-CAP INDEX STOCK FUND

Vanguard Small Cap Index Signal

Investment Fund Description

The investment seeks to track the performance of a benchmark index that measures the investment return of small capitalization stocks. The fund employs a passive management investment approach designed to track the performance of the MSCI US Small Cap 1750 index, a broadly diversified index of the stocks of smaller U.S. companies. It attempts to replicate the target index by investing all, or substantially all, of assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Annualized Investment Returns
